Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Journal of Immunology, Vol. 6 It was decided at a conference of the members of the Influenza Commission and the Research Laboratory workers that the problems to be investigated in New York City should be the following: 1. A study of the microorganisms of the upper respiratory tract in health, in common colds and in influenza. This investigation should include the diligent search for an epidemic microbial strain in influenza cases. Both filtrable and unfiltrable microbes were to be considered. 2. A continuation of our studies on hemoglobinophilic bacilli (group of the influenza bacilli) for the purpose of establishing the relationship of the influenza bacillus to both pandemic and sporadic cases of influenza. 3. A study of the permanence of type characteristics of influenza bacilli in persons after recovery from respiratory infections. It was considered of the utmost importance to establish as accurately as possible the stability of types.
