It was some years ago, with a commission to design a number of farm buildings with unusually attractive settings, that the problem presented itself of finding a the whole roof by furring on each rafter from 4 inches to 6 inches in height in the center of the roof and diminishing the furring to nothing at the ridge and eaves. The furring strips are then laid on horizontally about 4 inches on centers. At the gables the furring is constructed with the greatest care by 1 inch by 2 inch shingle-strips running with the roof rafters, which carry the general convex lines of the roof to meet the hanging verge...
